Xeno Cornets

YCR-8335 – in B \flat

YCR-8620S – in E \flat

The Xeno B \flat and E \flat cornets represent the new generation of some very traditional instruments. They offer a response and agility you really need to experience for yourself, and players have described the tone as both bright and warm, "Like the Sun". The Xeno were designed with and for brass band players and have the capability to fill any concert hall with beautiful, colorful sound.

*Thanks
10 Million!*

Xeno Cornets

The Xeno name has become well established as the brand of choice for discerning trumpet and trombone players. And now Yamaha has incorporated what they've learned developing these orchestral instruments, into some new cornets. The Xeno cornets were developed in close collaboration with some of the worlds best players and in particular David King, cornet soloist, Head of Performance Studies at the University of Salford and principal conductor of the Yorkshire Building Society band. David worked closely with Frankfurt based Yamaha R&D expert Thomas Lubitz, and the new instruments result from 2¹/₂ years of research and experiments.

Xeno B^b Cornet YCR-8335

Silver plated (YCR-8335S/8335GS)
Mouthpiece: David King Signature Model
Case: CRC606

Xeno cornets come in deluxe cases which provide excellent protection.

David King is one of the most dynamic figures in the brass band movement and has accomplished extraordinary musical achievements as a soloist, conductor, and educator. As a cornet soloist David has won numerous awards including the British Open Solo Championship for five consecutive years and the prestigious International Brass Musician of the Year. David is also regarded as one of the greatest conductors to arise from the brass band world and has represented England in the European Brass Band Championships on eleven occasions, winning an unprecedented ten times.

The new E^b cornet has been designed to provide comfort and security when performing in the high register, while maintaining a beautiful warm sound in any range. The intonation is incredibly accurate and the cornet plays with an even, nimble response.

Xeno E^b Cornet YCR-8620S
