How to try:

Individual exercises

- Play a chromatic scale (long notes without vibrato). Play it with, without and then with lefreQue again. Pay attention to intonation and evenness of tone production.
- Play octaves. Play it with, without and then with lefreQue again. Listen to your tone as if you play a duet with your own overtones. Pay attention to the difference in tuning with and without lefreQue.
- Play different fragments outside your comfort zone with difficult bindings or intervals. Feel the differences in ease of playing and pay attention to your intonation.

Joint exercise

- Play a scale together (long notes and without vibrato). Play it with, without and then with lefreQue again. First unisono and then in octaves. Listen to the difference in tuning and projection.
- Play a duet with any other wind instrument and pay attention to the differences in intonation.

We hope you enjoy these exercises. Thanks for trying lefreQue!
